Comment. The volume of food ration supply from the coldstorage house in Leipzig-Eutritzsch to Soviet units continued to decrease. It amounted to only 30 percent of the volume observed during the same months in 1953.

25X1

Comment. Fish supply slightly increased.

Comment. The supply to Soviet units from the Wurzen mills reached a remarkably low level. There were 15 carloads in May 1954 compared to 143 carloads in May 1953 and 57 carloads in June 1954 compared with 199 carloads in June 1953. This decrease is due to the food crisis in the GDR.
